

amethyst A20-RTR

FEATURES

- Designed for Roll-to-Roll Applications
- Developed for LED and Conventional UV Lamps
- Good Media Adhesion
- High Density Colour
- GREENGUARD Gold Certified
- Supported by NUtec Digital's Ink Delivery System (IDS) Warranty

OVERVIEW

Amethyst A20-RTR is a premium quality, roll-to-roll UV ink, designed for a wide range of flexible applications.

The Amethyst A20-RTR is a high density colour ink that cures with LED as well as Mercury Vapour UV lamps.

This formulation features a superior colour gamut for bright, vivid images.

It is GREENGUARD Gold certified to the highest standards for health-based chemical emissions, ensuring the ink is acceptable for use in sensitive environments, such as schools and hospitals.

Provided the inks are used in regular applications, using suitable substrates, the printed images will not fade unduly for up to 24 months.
